

*How to play?*  
**STUD POKER**

**5 Stud poker** is an easy and exciting stud poker game. First, place your bet on the ante spot. Next, you're dealt five cards. If you like your hand, you must bet double your ante. If you wish you could change one of your cards for the equal amount as your ante bet. If you fold, you lose your ante. The dealer then shows their cards. If the dealer doesn't have an ace/king or higher, you win even money for your ante. If the dealer has at least ace/king, and their hand is higher than yours, then they collect ante and your bet. If your hand beats the dealer's, you win even money on your ante, and you win odds on your bet.
